PROFESSIONAL EXPERIENCE

2009

SAUDI ROYAL GUARD

2009 – 2015

ICT CONSULTANT - (PROJECT MANAGEMENT OFFICE MANAGER (PMOM))

An integral member of the senior IT team, responsible for delivering highly visible business change projects, and planning and executing Information Technology strategies to maximise the effectiveness of existing systems and cutting-edge technology.

- Planned and prepared strategic IS plans.
 - Studied and investigated many new technologies and needed solutions.
 - Proposed technical solution for real problems faced the organization.
 - Spearheaded the creation of the IT department, including the IT governance strategy for the division and complete ITIL service structure to meet the needs of the organisation.
 - Led and managed the project management team, providing project managers with tools and shared resources to manage their activities.
 - Established a complete infrastructure strategy using latest technologies and successfully.
- Demonstrated strong stakeholder management and leadership for the continuous management of project scope, risks and issues.
- Worked closely with infrastructure teams, development teams and external partners, and evaluated vendors such as Oracle, TATA, and Ernst & Young.

2008

MINISTRY OF FINANCE

2008 – 2009

IT PROJECT MANAGER

Played a key role in the delivery of major ERP implementation projects across Finance, HR, Payroll, and Logistics functions, demonstrating strong project leadership and stakeholder management capability in the implementation of innovative technology requirements.

- Led a team of up to 70 resources, managing the entire project life-cycle for a new department web portal and archiving system, carrying out initial scoping and project planning.
- Tracked the achievement of project deliverables, focusing on the critical path, measuring variance and implementing corrective action to ensure efficient project delivery.
- Created and validated project milestones and critical success factors for submission to the Program Management Office, ensured the successful delivery of projects on time, to budget and in accordance with the Programme Plan.
- Contributed to key decision making on project scope to ensure continued compliance with defined project constraints.
- Managed critical relationships with cross functional teams and third party vendor Oracle to ensure achievement of project outcomes.

2001

MINISTRY OF DEFENCE

2001 – 2008

IT DEPARTMENT HEAD - IT PROJECT MANAGER

Played a key role in the delivery of various projects across HR, Payroll, Finance, and Logistics functions, demonstrating strong project leadership and stakeholder management capability in the implementation of innovative technology requirements.

- Managed critical relationships with cross functional teams and third party vendors.
- Tracked the achievement of project deliverables.
